

Do your people know what to do when disaster strikes?

Do you know how much disaster downtime could cost you?

Are you prepared, practiced and proficient when the unexpected occurs?

Join us for our premiere, free event during Business Continuity Awareness Week!

Resilience Review Roundtable: Are You Ready to Recover?

- Assess the 'disaster readiness' of your people
- Learn why it's critical to conduct a Business Impact Analysis (BIA)
- Understand why you need a Business Continuity Program (BCP)
- Identify the costs of downtime to your business
- Preparing a 'fire drill' approach to testing your BCP
- And more!

We'll hear from the University of Calgary about their recent experience with Ransomware and how they responded and recovered. Plus you'll have many opportunities to share ideas with colleagues from many industries.
